Felix Baastad Berg

Email: felix.berg@hotmail.no | Phone: +47 472 74 112 | Website: https://felixbaastadberg.github.io/

MSc in Advanced Computing at Imperial College London with a background in mathematics and research at MIT and Harvard. Fulbright Fellow, NeurIPS 2025 author and tech founder passionate about collaborating to model and understand complex systems.

EDUCATION

Imperial College London, MSc in Advanced Computing **09/2025 - 09/2026**

- Courses and research in machine learning, high-performance computing, deep learning and computational finance.
- Fully funded through the Aker Scholarship, awarded to Norway's top graduate talents.

MIT, Fulbright Fellow in Mathematics **01/2024 - 12/2024**

- Research and courses in statistical machine learning, statistics, reinforcement learning and time series forecasting.
- Projects include norm-based generalization bounds for CNNs and unsupervised learning with spiking neural networks.
- GPA: 5.0 / 5.0.

Norwegian University of Science and Technology, MSc in Applied Mathematics **08/2019 - 06/2025**

- Specialization in statistics with numerical methods, stochastic modeling, optimization and linear methods.
- GPA: 4.8 / 5.0 (estimated top 5 students in Norway's most competitive MSc in mathematics).

PUBLICATIONS & RESEARCH EXPERIENCE

Neurips 2025, Publication **09/2025**

- "Deep RL Needs Deep Behavior Analysis: Exploring Implicit Planning by Model-Free Agents in Open-Ended Environments". https://arxiv.org/abs/2506.06981

Harvard University, RajanLab **08/2024 - 07/2025**

- Discovered through statistical ML that agent memory encodes plans up to 100 time steps into the future - a novel finding.
- Analyzed hidden states of LSTM neurons for foraging RL agent using PPO. Supervised by Prof. Kanaka Rajan.
- Co-authored on abstract to COSYNE 2025 seminar and poster to Lyon conference.

Norwegian University of Science and Technology, Masters thesis **11/2024 - 06/2025**

- Developed a novel continuous attractor network module in JAX modeling grid-cell activity in the brain.
- Implemented and trained deep RL agents, running simulations on Harvard's HPC GPU Clusters.
- Analyzed recurrent-memory dynamics and the role of grid cells in agents' spatial planning.

PROFESSIONAL EXPERIENCE

Kateter, Co-founder (CTO → COO) **05/2022 -**

- Built and scaled digital learning platform reaching 10,000+ users and 30+ employees (https://kateter.no)
- Led development of an interactive math visualization engine using Three.JS
- Taught and recorded university-level math courses viewed by thousands of students.

Firda, ML intern (Summer & Winter) **01/2023 - 08/2023**

- Built and deployed a LangChain-based LLM system retrieving relevant document and sources.
- Designed metadata-rich JSON representations enabling structured retrieval and feature extraction for LLM outputs.

Heimstaden, Data Scientist (Intern → Part-time) **06/2022 - 12/2022**

- Developed models for German rent price strategy at Europe's second-largest residential real estate company.
- Performed data preprocessing and feature engineering in SQL inputed in the model.
- Delivered a two-day technical workshop in Berlin to the German investment team.

Atlas, Data Science Intern **06/2021 - 08/2021**

- Designed algorithms to analyze geospatial satellite data for renewable energy optimization.
- Implemented in Python (Django, GeoPandas) and SQL for production deployment.

Penumbra, Lead of Developement of Simulator **09/2020 - 05/2021**

- Led development of a rocket flight simulator for a student-built rocket (Propulse NTNU) that ranked 2nd of 75 teams at Spaceport America Cup 30K COTS.
- Programmed in C++ and developed Computational Fluid Dynamics (CFD) simulations.

HONORS

Aker Scholarship, Full-funding from Norwegian #1 top talent graduate program. **10/2024 -**

Fulbright Scholarship & Janson Legat Scholarship, Awarded for graduate study at MIT. **01/2024 - 12/2024**

Norwegian Finals of Physics Olympiad, Ranked as Norway's top high school physics students. **03/2019**

TECHNICAL SKILLS

Programming Languages: Python, C++, Javascript, R, SQL, Bash

Libraries & Tools: JAX, NumPy, PyTorch, Sklearn, Slurm, DJANGO, Pandas, Git, LangChain, CFD
